SUMMARY

High school student with deep interest and achievement in Artificial Intelligence and computer science. Strong academic background with national/international recognition in olympiads like AMO and UCO, and writing competitions like GEMA. Hands-on experience in AI research during Pre-College course in Brown University, and a 3-year volunteer at the CRY foundation.

EDUCATION

Physics, Chemistry, Maths with Computer Science (CBSE)

Graduating 2027

National Hill View Public School, Bangalore, India

9th: 97%, 10th: 96.4% (97% with AI)

Relevant coursework: Mathematics, Physics, Artificial Intelligence, Programming (Java, C++, Python), Chemistry

TECHNICAL SKILLS

Programming Languages: Java, Python, C++

Certifications: Java Specialization (Codio), Python (Google), C++ Specialization (Codio), AI/ML and Data Science (Brown University)

AI/CS Projects: Breast Cancer Classification, Stock Market Prediction, AQI prediction and forecasting

Tools and Platforms: GitHub, Google Colab, Jupyter Notebook, CodeChef, scikit-learn, PyTorch, TensorFlow, Kaggle, Pandas, NumPy, Matplotlib

ACADEMIC AND INTERNSHIP EXPERIENCE

Brown University Pre-College AI, ML, and Data Science Program, Online: Team Leader

Summer 2024

- Completed the intensive AI, Machine Learning, and Data Science track with a final grade of 98%.
- Led a team of four students in developing an end-to-end stock market prediction model using machine learning, presenting the project as the program's capstone.
- Applied concepts in supervised learning, time series analysis, and model evaluation, demonstrating initiative in project planning and peer collaboration.

AGSD AI Bootcamp, Online: Participant

August 2024 - November 2024

- Completed a structured 12-week bootcamp focused on foundational and advanced concepts in Artificial Intelligence, Machine Learning, and Python programming.
- Participated in weekly coding challenges and AI mini-projects; gained practical exposure to model development, data preprocessing, and evaluation techniques.
- Collaborated with peers and mentors on problem-solving exercises and algorithmic thinking tailored for real-world applications.

PROJECTS

AI Stock Market Predictor

Summer 2024

Developed during Brown University Pre-College Program in AI and Data Science.

- Designed and implemented a machine learning model to predict stock price movement using historical data and trend analysis.
- Used Python libraries such as Pandas, Scikit-learn, and Matplotlib for data preprocessing, training, and visualization.
- Led a team of four peers; collaborated on model tuning and evaluation, achieving over 86% directional accuracy in backtesting.

AI Breast Cancer Classifier

2024 – Present

Ongoing research project under AGSD mentorship.

- Building a multimodal deep learning model for breast cancer subtype classification (IDC, TNBC, MBC) using histopathology images and biomarker data.
- Utilizing PyTorch for CNN implementation, NumPy and Pandas for data handling, and Matplotlib for exploratory visualization.
- Aim to submit findings as a research paper in a student AI journal upon completion.

Creative Blog and Kindle eBook

2023 – Present

- Write and publish original fiction twice a month, exploring genres like historical fantasy, psychological suspense, and urban supernatural.
- Built a readership through consistent blog posts on <https://writerjourneyy.blogspot.com/> and formatted selected works into a Kindle e-book.
- Won GEMA's national short story competition and other inter-school awards for creative writing, and had the winning story published as a prize.

RESEARCH & PUBLICATIONS

AI-Based Air Quality Index (AQI) Forecasting in Bengaluru

2025

Published in IJSR; focused on using GRU models for AQI prediction.

- Conducted independent research exploring the role of deep learning in temporal air pollution forecasting.
- Built and evaluated GRU-based neural networks using Bengaluru air quality datasets; demonstrated significant improvement over traditional models.
- Published in the International Journal of Scientific Research (IJSR); available [https://www.worldwidejournals.com/international-journal-of-scientific-research-\(IJSR\)/recent_issues_pdf/2025/June/air-quality-i-june_2025_4561939467_6530047.pdf](https://www.worldwidejournals.com/international-journal-of-scientific-research-(IJSR)/recent_issues_pdf/2025/June/air-quality-i-june_2025_4561939467_6530047.pdf).

ACHIEVEMENTS AND ACTIVITIES

American Mathematics Olympiad, Global: Participant

2024

- Global Rank: 29, Country Rank: 6, Global Finals Rank: 14

Unified Cyber Olympiad, India: Topper

Year varies

- Stood 1st and 2nd nationally in two separate years.

Child Rights and You (CRY), India: Volunteer

2023 – Present

- Contributed over 60 hours per semester delivering interactive educational sessions to underprivileged students on cybersecurity awareness, digital literacy, and basic online safety.
- Designed and presented structured modules on digital marketing principles to help empower youth with employable 21st-century skills.
- Led teams during volunteering events like Walk to EmpowHER walkathon event and World Music Day.

LEADERSHIP AND EXTRACURRICULARS

Vice-Director of Digital Innovation

2025

Elected student leader for technology and innovation initiatives.

- Spearheading the launch of an AI-focused club in school aimed at encouraging peer-led learning through workshops, mini-projects, and competitions.
- Supporting digital transformation efforts within the school, including mentoring juniors in Python, HTML, and AI basics.
- Planning collaborations with external mentors and platforms to build student exposure to real-world AI applications.

Music and Performance

Ongoing

Trinity Grades 1–3 (Outstanding); Grade 4 ongoing. <https://www.youtube.com/@anjalidesai>

- Three years of experience in guitar and keyboard; trained in classical and contemporary styles.
- Performed in multiple live shows including school events, band-stage performances, and cultural programs as part of Dhuniscian.
- Created a personal YouTube channel to showcase music compositions and covers; actively publishing content since 2024 to build an online portfolio.
